### QUESTION-3:

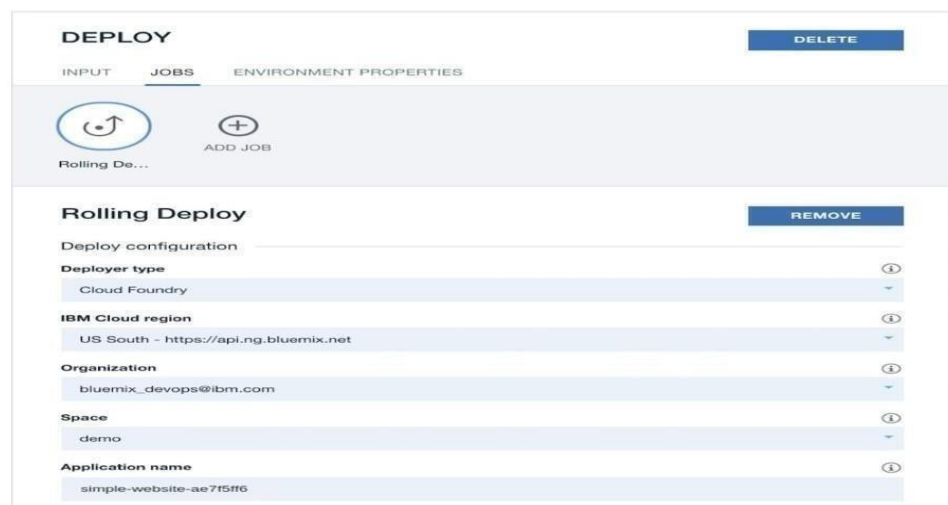

3. Create a IBM container registry and deploy helloworld app or jobportalapp.

Solution:

```

applications:

```
- buildpack: https://github.com/cloudfoundry/staticfile-buildpack.git
host: simple-website-{$random}

The screenshot shows the IBM Cloud Deploy console. At the top, there's a 'DEPLOY' header with a 'DELETE' button. Below it, there are tabs for 'INPUT', 'JOBS', and 'ENVIRONMENT PROPERTIES'. The 'JOBS' tab is active, showing a 'Rolling Deploy' section. This section includes a 'Deploy configuration' area with several fields: 'Deployer type' (Cloud Foundry), 'IBM Cloud region' (US South - https://api.ng.bluemix.net), 'Organization' (bluemix\_devops@ibm.com), 'Space' (demo), and 'Application name' (simple-website-ae7f5ff6). Each field has a dropdown arrow and an information icon. There's also an 'ADD JOB' button and a 'REMOVE' button for the current deployment.
